### Training Log

This form is to keep track of your progress teaching any given behavior. If you worked on a few different behaviors within a session, use a separate form for each behavior.

#### Behavior worked on:

#### Date

#### Session Length

Just keep a rough idea of how long the session was!

#### Treats Used

Keep track of what worked, what didn't work, etc.

#### Starting Point

This should be the final Starting Point from your previous session. If starting a new behavior, the baseline may be unrelated (Ex. sits on cue but has no experience with down)

#### Ending Baseline Step

This should be the highest level step that your the dog was able to respond correctly three consecutive times during the current session. This will also be the Starting Point for your next session.

#### Highest Level Step

This may or may not be the same as your Ending Baseline Step. For example, you may just get one response (as opposed to three consecutive responses) at a higher-level step. Record that here.
